Monthly / Quarterly Check-ups

Regular preventive maintenance ensures your pumping system performs efficiently and reliably. Our trained technicians perform motor checks, pressure tests, electrical inspections, and more. Choose between monthly or quarterly schedules for consistent performance.

Complete System Inspection

A 360° health check covering motors, valves, control panels, tanks, and more — to detect early signs of wear or malfunction. All readings and findings are documented for transparency.

ZERO Labour Charges

With an active AMC, you pay no labour cost for service visits or repairs — only genuine replacement parts at actual cost.

Quick Breakdown Support

AMC customers enjoy priority response and fast on-site fault diagnosis with genuine spares and follow-up checks.

Detailed Service Reports

After each visit, you receive a detailed service report with readings, technician notes, and recommendations for preventive action.
